

# UK Greenhouse Gas Reporting

James Davey,  
Climate Energy Science and Analysis  
Defra

# UK National System

## Other Research

Waste, f-gases, abandoned mine methane

## Department for Trade and Industry

Energy & fuel statistics

## Other fuel use data suppliers:

EUETS via Defra, UKPIA, ESI contacts, Transco, UK Coal, ISSB, BGS, Collieries

## Department for Transport

Transport statistics

## Defra

Strategic planning  
Overall coordination  
Research commissioning

## NETCEN

National Atmospheric Emissions Inventory (NAEI)

**Greenhouse Gas Inventory (GHGI)**

## Environment Agency, SEPA, DoE NI

Pollution Inventory (industrial processes & landfill)

## EUMM

Provisional CRF by 15 January

## UNFCCC

Final NIR & CRF by 15 April

## Defra

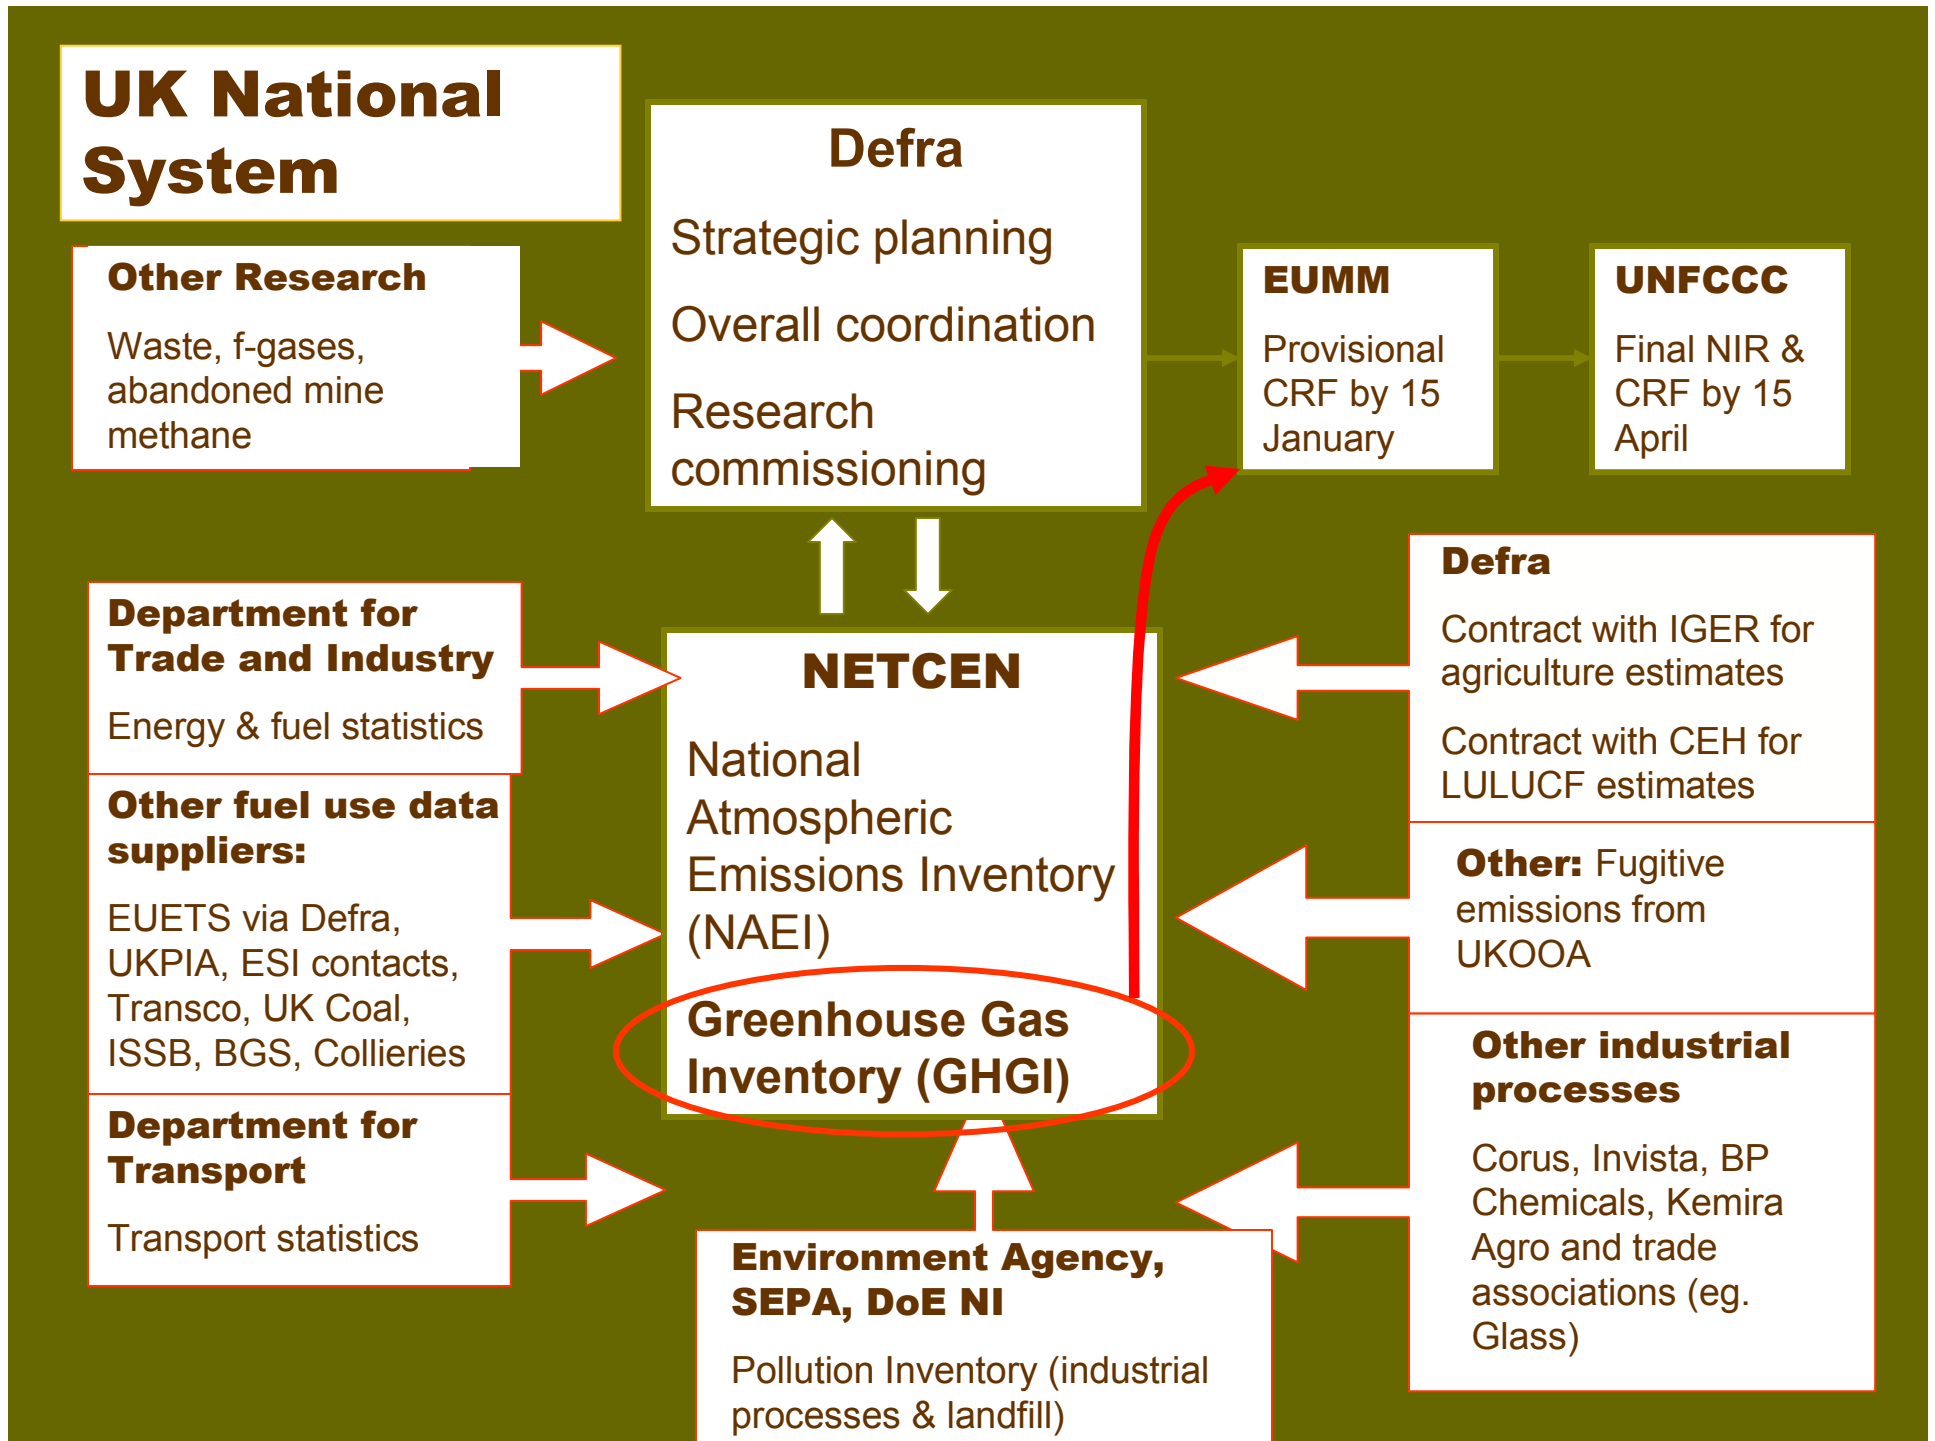

Contract with IGER for agriculture estimates

Contract with CEH for LULUCF estimates

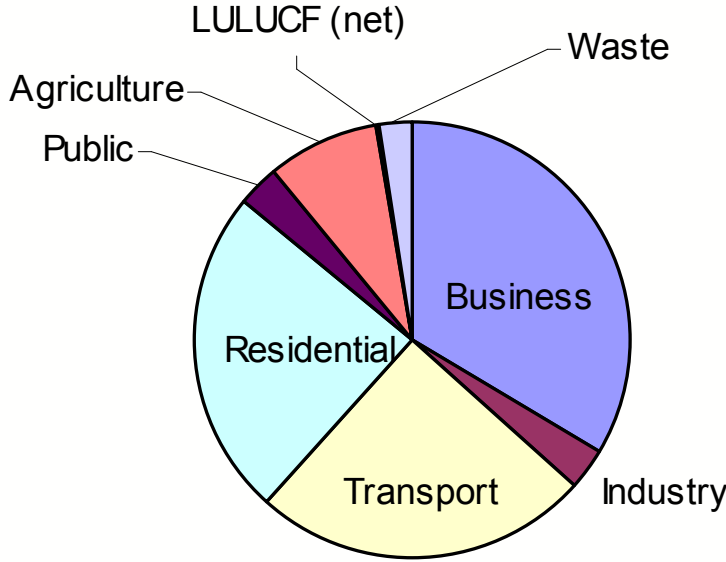

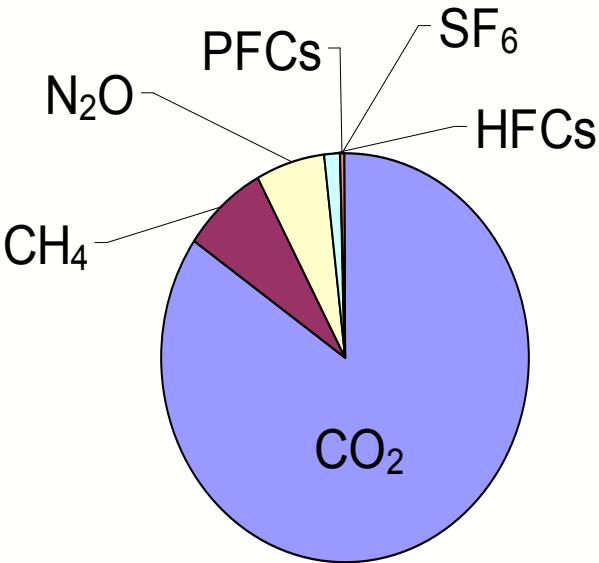

**Other:** Fugitive emissions from UKOOA

## Other industrial processes

Corus, Invista, BP Chemicals, Kemira Agro and trade associations (eg. Glass)

# UK GHG emissions

# The Challenge : Kyoto

- Decision 13/CMP.1 requires all Annex I Parties to Kyoto to submit calculation of **Assigned Amount** by 31 Dec 2006
- In Country Review of Assigned Amount completed in March. Awaiting outcome

# The Challenge : Climate Change Bill

- Statutory targets for CO2 emissions
- -26% to -32% in 2020
- -60% in 2050
- Energy White Paper suggests emissions reductions of -20% to -26% in 2020
- **More needs to be achieved**

# Energy White Paper CO<sub>2</sub> projection
