

# Nitrogen Dioxide in the United Kingdom

PB 9025A

## Correction

Within the Air Quality Expert Group report *Nitrogen Dioxide in the United Kingdom* Table 7.3, Annual average NO<sub>x</sub> and NO<sub>2</sub> concentration predicted by dispersion modelling, was printed with incorrect column headings. Four main column headings above the data should appear as follows: 'Measured 1999', 'Modelled 1999', 'Modelled 2005' and 'Modelled 2010'. Beneath these main headings subheadings that read 'NO<sub>x</sub>' and 'NO<sub>2</sub>' should appear, repeated four times, above the columns of numbers. The column headings to the left – 'Site' and 'Type' – should not be there. Table 7.3 appears correctly in the web version of this document, which is available at:
